Universally Applicable:

- Recycling systems
- Shredder systems
- Magnetic drum cleaning
- Plastics processing
- E-scrap processing
- Sand and gravel conveying technology
- Cement plants
- Can processing
- Cable strand preparation
- ...and much more.

You can Achieve with the FKS-8:

- No loss of transported goods
- Extended service life for conveyor belts
- No soiling of the area underneath the conveyor belt
- No freezing of the transported material on the scraper
- Elimination of segregation during sand and gravel processing

Extra Benefits: No Additional Energy Cost

Due to simple connection with V-belt technology to the existing conveyor belt

- Quick and easy replacement of the scraper blade
- Robust scraper shaft made of 1.4301 stainless steel
- Designed to meet the highest demands

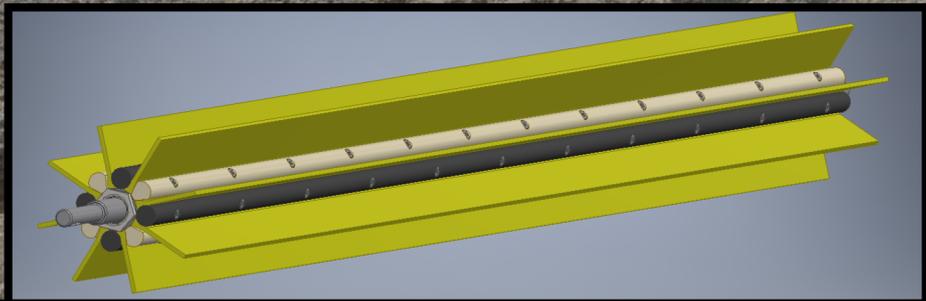

Worn-out conveyor belts due to conventional scrapers, but with FKS-8, these issues are resolved.

- No damage to the conveyor belt
- Longer life of conveyor belt
- Low maintenance requirements
- Significant cost savings

Our extensive range of applications ensures that hardly any requirement is foreign to us.

Available in standard widths 300mm - 3000mm

Model FKS-8: with 8 fully elastic wings
Model FKS-4: with 4 fully elastic wings
Other widths upon request!
